

# Indecisive

Loot Council (Updated 04.2024)

## RCLootCouncil

We use a loot council to decide how tradeable main raid loot is distributed.

## Do I need to download anything?

To effectively use the RCLootCouncil system everyone will need to download the addon [here](#)

Once a session begins tradeable loot that you can equip will be prompt you with the following window:-

## What button?

### Button Why

- Major** You need this item for your mainspec and it is a large upgrade.
- Minor** You need this item for your mainspec and it is a minor upgrade/sidegrade.
- Offspec** You need this item for your offspec.
- Mog** You would like this item for transmog.

## How loot is distributed

When deciding who gets an item we consider the following:-

- The button you pressed, indicating how big an upgrade you believe the item is.
- Your simmed DPS/HPS upgrade and note if this is your BiS item.
- The item you are replacing.
- How much loot you have recently had from the raid.
- How much effort you have been putting into gearing your character in general.
- Your attendance to raids and if you make yourself easily available when benched.
- Your performance in raids, both numerically and mechanically.
- Information that only the officers might be privy to, for example if someone has told us they are going to be missing raids for a prolonged period due to illness or other reasons.
- Your rank, trialists have lower priority on loot than current raiders as we need to mitigate the risk of people leaving with upgrades that could have remained within the raid team.

We will then consider the same for other people who want the item and come to the best decision with all the information at hand. **Our focus when we assign loot is the overall performance of the raid team and not you as an individual.**

If you ever feel aggrieved by a decision made by the loot council, you can speak to any of us

privately and we will explain our reasons to you. We have a zero tolerance policy when it comes to loot drama during the raid but are always happy to discuss in private.

### Simming your character

We use WowAudit to collate information about loot and the upgrade it provides your character. For this to work, you must update your droptimizer sim whenever you receive upgrades, and upload this link on our WowAudit page: <https://wowaudit.com/eu/emerald-dream/indecisive/>

To get an updated droptimizer sim, please do the following:

- Visit our WowAudit page: <https://wowaudit.com/eu/emerald-dream/indecisive/>
- Sign in using your blizzard account; this will connect you to the guild page.
- Click 'Wishlist - personal' on the left menu bar
- Upload a raidbots droptimiser URL for your character: 5 mins, mythic, max ilvl, patchwerk.

This also works for healers; it'll use your QE sims instead.
